Software Developer | MERN | Angular

Results-driven software developer with expertise in MERN and Angular stacks. Passionate about building scalable web applications and collaborating with teams to develop impactful solutions. Strong problem-solving skills with hands-on experience in full-stack development, cloud deployment, and UI/UX optimization.

SKILLS AND EXPERTISE

- ReactJs
- MaterialUI
- JavaScript
- Redux and Redux Toolkit
- Figma
- HTML
- Angular
- Angular Material
- TypeScript
- NgRx
- JWT
- CSS and SCSS
- NodeJs
- MongoDB
- AWS for cloud deployment
- EC2, npm
- RESTful APIs
- TailwindCss

PROFESSIONAL EXPERIENCE

Junior Software Developer

2024 - Present

Emdot Mincetech | Calicut

- Developing a College Management Application using Angular as part of a 5-member frontend team.
- Collaborating with the backend team to integrate APIs and ensure smooth data flow.
- Implementing responsive UI components and optimizing performance for a seamless user experience.
- Writing clean, modular, and maintainable code following best practices in Angular development.
- Debugging and fixing issues to enhance the application's stability and performance.
- Working with state management techniques and integrating third-party libraries to improve functionality.
- Participating in code reviews, daily stand-ups, and sprint planning to ensure project progress and alignment with business goals.

Fullstack Developer

2023 - 2024

Selfstack | Calicut

- Developed proficiency in the MERN (MongoDB, Express.js, React.js, Node.js) stack for full-stack web development.
- Completed multiple mini projects to reinforce learning and showcase skills in CRUD operations and complex web applications.
- Led the development of an eCommerce website, overseeing user interface design, payment gateway integration, and product inventory management.
- Enhanced problem-solving abilities and gained practical insights into the software development lifecycle through hands-on project work and collaboration.

PROJECTS

[BicycleRepublic](#)

GitHub-Repository: [Link](#)

E-Commerce Application

Developed a comprehensive e-commerce website specializing in bicycles, featuring two distinct categories: Mountain bikes and Road bikes. Designed and implemented both the admin and client sides using Node.js, Express, MongoDB, and JWT for authentication. Employed EJS and Tailwind CSS for frontend development.

- Implemented user authentication using JWT for secure access.
- Utilized MongoDB for efficient data storage and retrieval.
- Developed RESTful APIs with Express for seamless communication between client and server.
- Integrated Chart.js for analytics on the admin side.
- Admin functionalities include adding, updating, and deleting products, as well as managing categories and user blocking.
- Implemented search functionality, filtering options by price and category, and sorting capabilities for users to efficiently find and navigate products.

[ASocialHub](#)

GitHub-Repository: [Link](#)

Social Media Application

Developed ASocialHub, a MERN stack-powered social app facilitating seamless user connections with secure JWT authentication. Leveraging an intuitive React front end and efficient MongoDB data storage, the platform prioritizes simplicity, fostering interactions through posts and engagement. Implemented secure JWT authentication for user login and authorization, ensuring robust security.

- Leveraged React for an intuitive front end and MongoDB for efficient data storage.
- Focused on simplicity, fostering user engagement through posts and interactions.
