PROFESSIONAL EXPERIENCE

Software Developer

2024 - Present

Emdot Mincetech | Calicut

- Developing core modules for Embase Prosuit (Enterprise College Management SaaS) using Angular, TypeScript, and RxJS.
- Collaborating with the backend team to integrate RESTful APIs and ensure smooth, reactive data flow.
- Implementing responsive UI components with Angular Material and Tailwind CSS for optimized user experience.
- Writing clean, modular, and maintainable code following best practices in Angular enterprise development.
- Debugging and resolving complex state management, template type-checking, and performance bottlenecks.
- Participating in code reviews, daily stand-ups, and sprint planning to ensure timely milestone delivery.

Fullstack Developer

2023 - 2024

Selfstack | Calicut

- Developed proficiency across the MERN stack (MongoDB, Express.js, React.js, Node.js) for end-to-end web applications.
- Built and deployed scalable full-stack projects featuring user authentication, database modeling, and RESTful APIs.
- Led the development of full-featured web applications, managing UI design, payment integration, and inventory management.
- Strengthened problem-solving capabilities and agile software development lifecycle methodologies.

PROJECTS & ENTERPRISE WORK

Embase Prosuit — Examination & Academic Workflow

Enterprise SaaS | Angular

College Management SaaS Application (Emdot Mincetech)

Engineered examination and academic management modules for higher education institutions. Implemented complex multi-step workflows with draft persistence, validation, status-based navigation, examination applications, and revaluation handling.

- Built reactive forms with robust HttpClient API integrations, error boundaries, and strongly typed TypeScript models.
- Implemented role-based permission views and seamless state management utilizing RxJS observables.

Embase Prosuit — Finance & Operations Portal

Enterprise SaaS | Angular

Administrative Financials & Analytics Engine

Built financial input interfaces, fee management workflows, and hostel mess calculation engines. Implemented advanced data tables featuring dynamic search, filtering, sorting, pagination, bulk actions, and structured report exports.

- Integrated ApexCharts visual metrics reporting for administrative insight dashboards.
- Streamlined high-volume operational data entry for administrative staff with high responsiveness.

[BicycleRepublic](#) — E-Commerce Web App

GitHub-Repository: [Link](#)

Fullstack E-Commerce Application | Node.js, Express, MongoDB, Tailwind CSS

Developed a comprehensive e-commerce website specializing in bicycles. Implemented both admin and client sides using Node.js, Express, MongoDB, and JWT authentication with search/filtering capabilities.

[ASocialHub](#) — Backend Social Application

GitHub-Repository: [Link](#)

Backend REST API & Services | Node.js, Express, MongoDB, JWT

Architected and developed the backend REST API services for a social networking platform. Built JWT-secured user authentication and authorization, post creation and interaction endpoints, and optimized MongoDB schema models.
